"What has passed is already finished with. What I find more interesting is what is still to come."

Summary

PASSIONATE TECHNOLOGIST AND PROBLEM SOLVER WITH EXTENSIVE EXPERIENCE BUILDING ENTERPRISE CLOUD/ON-PREMISE SOLUTIONS, SEEKING A LEADERSHIP POSITION TO BUILD AND IMPLEMENT A LONG TERM IT STRATEGY AT AN ENTERPRISE.

Highlights

- Designed and implemented a public facing cloud SAAS solution for Microsoft, in production today at all the retail stores in USA.
- Maintained a cloud-based API in PRODUCTION in Azure. (3M requests a month)
- Experience designing and building Micro services and executing an API first strategy.
- Standardized CI/CD in projects using Jenkins in the organization.
- Well versed designing high availability applications on public clouds and on-premise.
- Proponent of the Open Source Bazaar model. Believe an Inner Source model is the path forward at large corporations.
- Experience working on geographically and functionally diverse agile teams.
- Won the employee of the year award at Jacada leading to my promotion to a leadership role in 2013.

Recent Experience

Slalom LLC

Atlanta, GA

SOLUTION PRINCIPAL

Sep. 2018 - Current

- Plan and execute technology projects for clients.
- Lead technology decisions, day to day activities at client location inline with the client's long-term goals.
- Assist in writing SOWs and proposals for future work.
- Currently managing 3 engineers; mentoring the engineers with a view to improve their skills and guide them to be leaders in the future.

Jacada Inc

Atlanta, GA

DIRECTOR PROFESSIONAL SERVICES

Nov. 2013 - Sep. 2018

- Oversight over multiple client projects. Managed 3 projects concurrently during my time. With a combined budgets of around 1.6M USD.
- Technology oversight for the whole practice, driving knowledge sharing and best practices.
- Manage time and material delivered to the client to maintain a mutually successful relationship.
- Responsible for client relationships; stepping in to resolve any conflicts or escalations.
- Act as a safety check with any technology decisions to ensure long term client goals are considered.
- Responsible for hire and performance of 5-15 employees depending on workload.
- Led the technology aspects/solution of POCs for sales initiatives. Help shape solutions to client needs.

Recent Projects

Global Payments

Atlanta, GA

SLALOM LLC

Nov. 2021 - Mar. 2022

- Worked on modernization effort going from COBOL to Java
- Worked primarily as an individual contributor
- Contributed to a proprietary UI tool based on configuration
- Built APIs in java and springboot to be consumed internally
- Reverse engineered COBOL modules into a backlog

The Home Depot

Atlanta, GA

SLALOM LLC

Apr. 2020 - Oct. 2021

- Major contributor to a company wide cloud native architecture reference document with focus on security for web applications and PCI DSS
- Managed a team of 12 consultants contributing to modernizing a payment platform from HPE Nonstop to GCP
- Primary contributor for CICD enablement.
- SME for multiple teams for java and springboot upgrades.
- Worked on reactjs with redux front end.
- Built APIs in golang
- Led efforts to raise morale through a difficult time for everyone.

NCR

Atlanta, GA

SLALOM LLC

Sep. 2019 - Apr. 2020

- Leading the migration of their SMB product called Silver from AWS to GCP.
- Silver is an all-in-one cloud based POS platform for small businesses.
- Helped sell additional scope after an initial small assignment to help with specific technology problems the customer was looking to solve.
- Automated install of complex custom configurations, for e.g. a highly customized SQL Server implementation on custom compute instances.
- Built solution to cutover with minimal downtime taking into consideration security requirements of NCR affecting this timeline.
- Architected a solution for failover across AWS and GCP cloud.
- Led efforts to instill a DevOps culture.
- Coordinated work between Google, Slalom and NCR to find solutions for GCP specific quirks.

The Home Depot

Atlanta, GA

SLALOM LLC

Sep. 2018 - Oct. 2019

- Delivered a solution to facilitate retirement of their \$2B payments system.
- Executed the plan ahead of schedule, allowing the customer to plan future tasks.
- Helped the customer unentangle their internal dependency spaghetti allowing them to streamline the future work based on current team workload.
- Came up with a strategy to allow the customer to safely sunset their, monolithic, hard to maintain system, which was expensive and hard to scale.
- Led a major undertaking to shine a light on the system, with in depth analysis of code.
- Our documentation captured all the stop gaps solutions in place for several years for core business components like their web store payment and paid for years of technical debt.
- Assimilated all the tribal knowledge which was key to the maintenance and history of the system.
- Due to the lack of comprehensive test plan, tailor made a migration plan to allow parallel execution without affecting downstream systems.

Microsoft

Atlanta, GA

JACADA INC

Nov. 2015 - Aug. 2018

- Designed and implemented a public facing solution to be an alternative for their IVR.
- Built an exceptional relationship with the client helping the client become successful internally. Our client was promoted as a result of the project's success.
- Sold multiple renewals for support and new work, with the project becoming one of Jacada's biggest success stories.
- Redirected our learnings on the project using the early release of Jacada's SaaS product allowed the product team to make the product more robust and marketable to other customers.
- Developed several custom JavaScript plugins to customize the solution.
- Built and maintained a custom backend API in Azure cloud to ease integration pains with Microsoft infrastructure, as a side effect we were one of the first 3rd parties to use Azure AD and many other Azure cloud products.

American National

Atlanta, GA

JACADA INC

Sep. 2017 - Aug. 2018

- Designed their call center application.
- Leadership oversight on the project while managing the scope.
- Oversaw their deployment to production, being the feet on the ground as the customer deployed to their workforce.
- Developed a custom JavaScript framework to minimize rework and allow for reuse and extensibility.
- Assisted their infrastructure admins to deploy the solution across various lifecycles.

Humana

Atlanta, GA

JACADA INC

May. 2016 - Jan. 2017

- Implemented a Micro-Services architecture.
- Championed an API first approach.
- Designed a timer-based solution to enable asynchronous submission of user data to backend system.
- Led UI/UX design while keeping in line with business feedback.
- Orchestrated of development tasks while working with a geographically spread teams across the world.
- Created a framework with an eye on future enhancements that other developers could follow.
- This framework helped save 20% development time planned for the rest of the project along with a non trivial drop in bug occurrence.

Skills

DevOps	Docker, Terraform, Jenkins
Cloud	Azure(Website, ActiveDirectory, Blob Storage, Active Directory), AWS(EC2, Beanstalk, Lambda, CodePipeline, S3 static web hosting, SNS, AppSync, Cloud Formation), GCP(Compute, Storage, VPC, Load Balancer, GKE), Heroku
Back-end	Express, KOA, HAPI, Spring boot, VertX
Front-end	React, Angular, Sencha, HTML5, CSS, LESS, SASS, Bootstrap, Bulma, Foundation
Programming Languages	Node.js, JAVA, JavaScript, C#, Golang, python English, Telugu, Hindi

Education

George Mason University(Volgenau School of Engineering)

M.S. IN INFORMATION SYSTEMS

Fairfax, VA

Jan. 2007 - Jan. 2009

Osmania University

B.E. IN COMPUTER SCIENCE

Hyderabad, India

May. 2002 - May. 2006
