Executive Summary

Technology executive with 15+ years of experience leading large, multi-location engineering organizations building consumer-facing digital platforms at scale. Proven track record modernizing enterprise technology through cloud migration, composable and microservices architecture, and data platform innovation. Deep expertise unifying multi-brand digital ecosystems, deploying AI capabilities to enhance engineering productivity and personalization, and managing hybrid teams of FTEs, contractors, and global vendors. Combines strong technical credibility with executive communication skills to translate complex technology vision into business outcomes.

Professional Experience

GoTo Foods LLC

2021 – Present

Sr Director, Enterprise Architecture & Platform Engineering

- Served as the single architectural authority across a multi-brand consumer organization with 7 distinct brands, guiding engineering direction for digital platforms, content and marketing technology, data, and integrations — influencing outcomes across 200+ engineers and contractors.
- Defined and executed a unified, composable digital platform consolidating 7 independent consumer-facing brand apps and websites into a shared architecture, materially reducing development costs and enabling rapid feature rollout across the portfolio.
- Re-architected backend systems to a microservices and event-driven model, standardizing APIs, service contracts, and integration patterns — enabling modular, independently deployable services across brands.
- Designed and governed Martech, CDP, and content platform integrations, aligning third-party systems with a centralized data model to enable accurate analytics, attribution, and personalization at scale.
- Standardized analytics and event instrumentation across web, mobile, and backend systems, improving data quality and enabling data-driven decision-making across brands.
- Championed enterprise-wide **AI and LLM adoption**: defined architectural patterns, guardrails, and best practices for safe, scalable usage across engineering and product teams.
- Led design and implementation of **agentic AI use cases** across consumer-facing products and internal workflows, focused on automation, personalization, and operational efficiency.
- Embedded LLM capabilities into APIs, event-driven services, and internal tooling — unlocking measurable productivity gains across engineering teams.
- Partnered with security and compliance to establish governance and operational standards for AI-assisted development, balancing innovation with security and reliability.
- Reduced time-to-market by approximately 40% and improved system uptime by approximately 30% through platform modernization and architectural consolidation.
- Built and led a senior architecture organization of principal and lead architects, fostering a culture of technical excellence, mentorship, and continuous improvement.
- Managed technology budgets and vendor relationships, aligning platform investments with business priorities and balancing innovation with operational excellence.

Slalom Consulting
Senior Delivery Principal

2018 – 2021

- Led multi-million-dollar digital transformation, cloud modernization, and platform initiatives for Fortune 500 clients in media, eCommerce, financial services, and consumer technology.
- Directed cross-functional, globally distributed teams spanning engineering, architecture, product, and design across multi-year enterprise engagements.
- Conducted a multi-year enterprise assessment of a legacy platform for one of the largest eCommerce companies in the U.S., defining the target-state composable architecture and cloud modernization roadmap.
- Led a major cloud migration from on-premises and AWS to GCP for a leading technology provider, including re-platforming of consumer-facing services.
- Served as primary executive-facing delivery and technology advisor, translating business strategy into actionable engineering and platform roadmaps for C-suite stakeholders.
- Managed blended delivery teams of in-house engineers, nearshore, and offshore contractors, ensuring high velocity, quality, and alignment across locations.
- Achieved approximately 95% client satisfaction and repeat business across multiple multi-million-dollar engagements.
- Implemented Agile and DevOps operating models, increasing deployment frequency by approximately 30% and reducing lead time by approximately 25%.
- Mentored delivery leaders and principals, strengthening leadership depth and organizational maturity.

Jacada (acquired by Uniphore)
Director, Professional Services

2014 – 2018

- Owned global professional services delivery for enterprise customers, leading large-scale implementations for Fortune 500 clients across multiple geographies.
- Managed hybrid delivery teams of FTEs and contractors across global locations, ensuring consistent quality and velocity.
- Held end-to-end accountability for delivery from pre-sales through post-implementation, managing complex integration programs.
- Acted as a trusted advisor to C-level stakeholders, aligning technology delivery with business objectives and driving organizational change.
- Served as the senior-most technical leader within services, providing architectural guidance, escalation support, and engineering direction.
- Built and scaled a global professional services organization through recruiting, training, and standardized delivery practices.
- Partnered with product management to influence product roadmap based on client needs and market insights.

Technology & Platform Expertise

Languages & Frameworks: TypeScript, Node.js, Java (Spring Boot), NestJS, Next.js, React Native, Tailwind CSS

Cloud & Platform: Microsoft Azure (AKS, Front Door, API Management, Functions), Google Cloud Platform, Vercel, Cloudflare

Architecture: Composable/modular architecture, microservices, event-driven systems, headless CMS patterns, API-first design

Data & Messaging: Cosmos DB, Databricks, Event Hub, Service Bus, real-time event streaming

AI/ML: LLM integration patterns, agentic AI architectures, AI-assisted engineering, personalization pipelines

Analytics & Observability: GA4, Firebase, Splunk, Amperity CDP

Core Strengths

Multi-Brand Digital Platform Strategy • Composable & Cloud Architecture • AI/LLM Strategy & Personalization • Global Hybrid Team Leadership • Cross-Functional Collaboration (Product, Design, Engineering) • Vendor & Budget Management • Security, Compliance & Governance • Organization Building & Mentorship

Education

Master of Science in Information Technology George Mason University, Fairfax, VA	<i>2007 – 2009</i>
Bachelor of Technology in Computer Science Osmania University, Hyderabad, India	<i>2002 – 2006</i>
